This project will begin the preliminary design and National Environmental Policy Act (NEPA) review to replace Five Mile Road Overpass over I-84. The concept includes widening the bridge from 2 to 4 lanes and widening Five Mile road from 2 to 5 lanes from just north of Overland Road to Franklin Road in the City of Boise. Work includes curb, gutter, sidewalks, and enhanced bike lanes on both sides of the roadway.(Construction is shown in key numbers ORN23591 and RD203-04.) (\$2,018,000 in federal funding for right-of-way intended for sidewalk work only).

US-26 from Idaho Falls to Wyoming is a rural, two- or four-lane highway with at grade intersections. Within the Idaho Falls area there are a few signalized intersections but the remainder are unsignalized intersections. As is typical with rural highways, some of the unsignalized intersections are some of our highest accident locations. These seem to be the intersections closer to Idaho Falls where traffic volumes are higher. This project will evaluate alternative intersection designs for limiting the movements through the intersection in order to reduce the conflicts in the intersections, thus increasing safety.

STATE OF IDAHO (ITD)	SPR	SPR	RW	-	-	-	-	-	-	-	-	-	-	-	G		
Increasingly, state departments of transportation (DOTs) are challenged to design and build longer life concrete pavements that result in a higher level of user satisfaction for the public. One of the strategies for achieving longer life pavements is to use innovative materials and construction optimization technologies and practices. The purpose of this pooled fund project is to identify, support, facilitate and fund concrete research and technology transfer initiatives.

Only through the growth of a positive safety culture can significant and sustainable reductions in crash fatalities and serious injuries be achieved. Towards that end, this pooled fund program will:																	
(1) conduct research to identify solutions to specific culture-based traffic safety problems, taking advantage of the implementation opportunities to improve traffic safety;																	
(2) develop resources to enhance understanding and application of traffic safety culture strategies; and																	
(3) provide technology transfer of best practices in traffic safety culture strategies.

Plan and design 12 multimodal transportation projects in the Cities of Boise and Garden City. When constructed, the project will provide low-stress, multimodal links between a community separated by Interstate 184, US 20/26, the Bench, and the Boise River. The project includes filling sidewalk gaps, signaling crossings, implementing Americans with Disabilities Act accessible pedestrian ramps and signals, building multiuse pathways and designated bicycle facilities, upgrading transit bus stops, and evaluating green stormwater infrastructure to prevent runoff from entering the Boise River. Construction is currently unfunded.

Design and construct a pathway and bicycle/pedestrian bridge to remove a 1/2 mile Greenbelt detour between 52nd Street and Remington Streets in the City of Garden City. The pathway will connect the Greenbelt with existing pathways on Plantation Island approximately 230 feet upriver from the intersection of the Greenbelt and 52nd Street.

BOISE, CITY OF	CARBON-TMA	CARBON-TMA	RW	-	-	-	-	-	-	-	-	114	106	8	M	
Eagle Road/S.H. 55 is a high-speed and high-volume highway without bicycle facilities. There are multiple residential subdivisions along the highway that would benefit from being able to bicycle comfortably on Eagle Road to access schools, parks, restaurants, and major stores. Eagle Road is a regional road linking the cities of Meridian, Boise, and Eagle. Without a comfortable pathway, people choose to drive to their desired destination even though it is within bicycling distance. This pathway will increase the safety of those bicycling and driving on the corridor by giving bicyclist a predictable space to ride.

ACHD staff reviewed a list of agency requested pedestrian crossings projects that are not currently programed in the Integrated Five-Year Work Plan. Staff focused on projects that solve a known safety concern and improve connectivity for bikes and pedestrians to important destinations. ACHD has identified five crossing locations to install either a PHB or RRFB. These five locations have support from either an ACHD Neighborhood Plan, and/or a partner agency and the policy support of ACHD's Livable Streets Design Guide. The location of these priority crossings are: <ul style="list-style-type: none"> • Maple Grove and Shoup – Create a safer pedestrian crossing on an arterial street and improves access to Pine Grove Park and regional bike route, Boise • Beacon and Grant – Improves neighborhood access to grocery store and BSU, Boise • Hill and Parkinson – Creates a safer pedestrian crossing to Guerber Park, Eagle • Linder and Ardell – Creates a safer pedestrian crossing for students going to school, Kuna • Alworth and 50th - Creates a safer pedestrian crossing (Top 10 priority for city) - Garden City

This project will provide ADA accessibility to West Park, which currently does not have any alternative means to access the facilities aside from the access roadway, which is a critical safety issue brought to attention by the Nampa Bike & Ped committee. This project intends to provide accessibility to the park from the roadway as well as add looped connectivity to the Parks existing pathway, and will reconstruct the existing deteriorated access to the bathroom facility.

This project supports the development of a regional Carbon Reduction Strategy to further the analysis and implementation strategies of the State's Carbon Reduction Strategy required by IJJA. This study will investigate vehicle alternatives, mode choices, construction practices, and infrastructure investments to reduce transportation-related greenhouse gas emissions and establish performance measures and targets for greenhouse gas emission reductions. The project will include an analysis of the regional transportation system's contributions to greenhouse gas emissions and evaluate strategies based on their impact on air quality and cost-effectiveness. The most impactful and cost-effective strategies will be identified.

This project will provide for an upgrade to the existing span wire signal and controller system to a pole and mast arm traffic signal at the intersection of Science Center Dr. and N. Blvd. This will include improved head visibility, mast arm signing and intersection lighting. Also, beginning at N. Blvd and extending to Holmes Avenue on Science Center/Anderson St the pavement will be rehabilitated, replacing rutted and cracked pavement and the parabolic crown.

This project will improve safety for roadway users by widening a bridge, widening shoulders, installing white thermoplastic rumble strips and flatten side slopes. This will remove obstructions to errant vehicles, increases the recovery area on pavement, provides drivers visual guidance with an alert of lane departure and improves recovery area with a reduction in overturning potential.

This project will replace the West Bridge Street Bridge over the Snake River in Blackfoot because the existing bridge (23120) does not serve the needs of Bingham County, the City of Blackfoot or various industrial interests. The existing bridge, built in 1936 is a steel truss bridge with significant vehicular damage to the steel truss superstructure, large areas of delamination and spalled concrete and settlement and twisting of piers. The project would remove the existing bridge and build a new bridge adjacent to the current structure.

BURLEY HD	STP-RURAL (L) STP-RURAL	RW		-	-	-	-	-	-	-	-	575	533	42

This project will rehabilitate 2 miles of pavement to include: Roadway ballast to support the increased heavy truck traffic associated with the farm to market operations, Improved horizontal and vertical alignment by removing substandard curves, widened road and shoulders to meet American Association of Highway and Transportation Officials (AASHTO) standards and allow for safe passage of vehicles, and improved shoulder slopes, ditches, and drainage structures to improve the drainage system. This will result in a safer, efficient, and more durable road for the traveling public.

SHOSHONE COUNTY BR-LOCAL BR-LOC		RW	-	-	-	-	-	-	-	-	-	-	-	-

This project will replace the Pine Creek Rd. Bridge located over Pine Creek in Shoshone County. The bridges substructure is in critical condition with its steel piles rusted, abutments cracking and its concrete on the southwest wing wall spalled exposing rebar. Significant scour has occurred and the bridge railing has also been damaged. This project is located on STC-5750 between mile points 5.15 and 5.55.

To take the alternatives developed in the Lakes Highway District planning study and carry them into the NEPA for final evaluation of alternatives, selection, design, and construction of improvements near Athol, Idaho in Kootenai County. This includes a replacement and relocation of a structurally deficient bridge across the UPRR and realigns Old Highway 95 to provide an improved connection to a future interchange at Parks Road and US 95.

This project will replace the Main St. Bridge located over Pine Creek between Silver Street and Seventh Street. The bridge substructure is in critical condition as the concrete girders and abutments have numerous cracks and both of the bridges pier walls have been undermined. The steel piles supporting the bridge have completely lost their protective coating and are heavily corroded and pitted. The bridge and approach guardrails are all substandard, highlighting serious safety concerns.

Replace a six-legged intersection at SH-19 (Simplot Blvd.) and I-84B (Centennial Way, Cleveland Blvd., and Blaine St.) with a roundabout intersection in the City of Caldwell. The project is located on STP-719 at mile point 19.875.

Notes:

- 1: Project is also shown in a Transportation Improvement Program
- 2: Project is being advance constructed with non-federal funds
- G: Project is grouped in STIP
- M: Project included in multiple programs
- B: Project addresses Federal Bridge Condition PM
- P: Project addresses Federal Pavement Condition PM
- R: Project addresses Federal Travel Time Reliability PM
- A: Project utilizes an alternative contracting method.
- W: Work zone safety priority

Phases:

- CN - Construction, utilities, construction engineering, purchases
- PE - preliminary engineering by state and/or consultant forces
- RW - Right-Of-Way acquisition
